GRIFERIA

griferia

TECNOLOGIA

Tecnología

El líquido máspreciado en el planeta cae del cielo, es inseparable de la vida en la tierra y su disponibilidad, fue y siempre será una condición esencial para el establecimiento de la población y el desarrollo de todas las actividades humanas. Los expertos dicen que sólo el 3% del agua del planeta es agua dulce. Es por eso que hacemos grifos con bajo consumo de agua, para preservar este valioso recurso.

Technology

The most precious liquid on the planet falls from the sky, is inseparable from life on earth and its availability, was and always will be an essential condition for the establishment of the population and the development of all human activities. Experts say that only 3% of the planet's water is fresh water. That's why we make faucets with low water consumption, to preserve this valuable resource.

ECO STOP

Nuestros monomandos disponen de un sistema de doble posición de caudal, lo que permite el ahorro de agua. Al accionar la palanca para abrir el grifo, el usuario nota una resistencia a un primer punto, donde se suministra el 50% del caudal. Si el usuario desea el caudal máximo debe abrir la palanca en la segunda posición.

ECO STOP

Our basin mixers have a double flow position. This system offers the possibility to save water because when the consumer open the mixer, they notice a resistance point where 50% of the flow is provided. If the consumer wants, they can achieve maximum flow.

APERTURA ECONÓMICA

Nuestro sistema permite realizar la apertura total de agua fría desde la posición central del mango, evitando el arranque de las calderas, calentadores y el consumo de agua caliente. De esta manera, tendremos un ahorro energético y el respeto por el medio ambiente.

ECONOMIC OPENING

Our system offers the possibility of opening the cold water only with the central position of the handle, avoiding the start of boilers, water heaters and hot water consumption. That way, we will have a saving of energy and respect for the environment.

LIMITADOR DE CAUDAL

Nuestros limitadores permiten determinar qué caudal máximo se desea, reduciendo el consumo de agua y manteniendo el confort de uso.

FLOW LIMITER

Our water limiting systems allow determine the maximum flow wanted, reducing water consumption and maintaining comfort of use.

SISTEMA TERMOSTÁTICO

Se evita el riesgo de quemaduras, así como el consumo excesivo de agua caliente. Permite limitar la temperatura máxima con el bloqueo del recorrido de la palanca en los monomandos.

THERMOSTATIC SYSTEM

This system avoids the risk of burns and the excessive consumption of hot water. It permits to limit the maximum temperature with the button lock on the mixer handle.

DURABILIDAD

Nuestra grifería destaca sobre todo por su gran resistencia ya que todos suscomponentes externos son metálicos, lo que permite una gran durabilidad con el paso del tiempo.

DURABILITY

Our mixers are really resistant due all their external components are metallics, offering durability over time.

SENSIBILIDAD

Nuestros cartuchos permiten regular cómodamente la temperatura deseada. Además, nuestros cartuchos termostáticos reaccionan en menos de un segundo a variaciones de temperatura y caudal manteniendo la temperatura solicitada.

SENSITIVITY

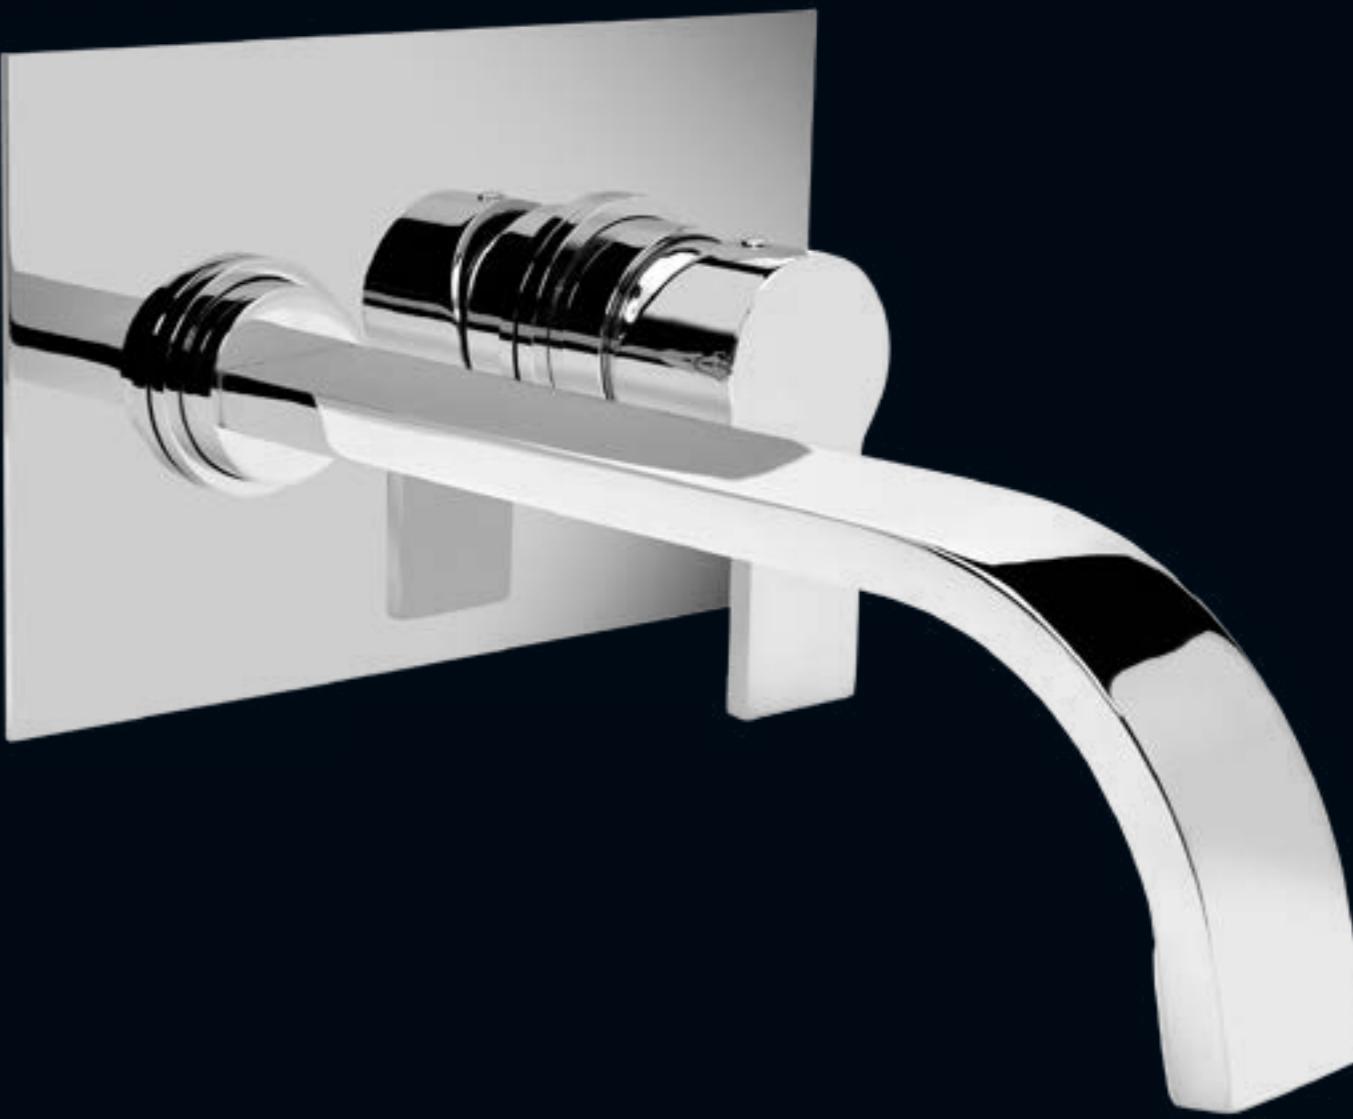

Our cartridges can regulate the desired temperature comfortably. Furthermore, our thermostatic cartridges react in less than one second to temperature variations and can maintain the required flow temperature.

Aplicamos un control de calidad en todos los procesos de producción, garantizando así un alto nivel de calidad en todos los productos que fabricamos. El uso de materias de primera calidad y estricto control en lo proceso de manipulación de materiales, garantizan al consumidor la alta calidad del producto. Nuestras materias primas de alta calidad son producidas en Alemania, Holanda e Italia. Utilizamos solamente ligas de metal amistadas ambientales: CB7555S (latón fundido) y CW614N (barra latón); Nuestro cromado, fruto de varios años de experiencia, garantiza una perfecta nivelación de espesores de las piezas, con un nivel micragem de 10-12 níquel y 0,25 a 0,30 cromo, garantizando una resistencia fuerte al desgaste con un brillo duradero e inalterable. Nuestras piezas se ensayaron a 100%, visualmente y al nivel de sellado.

We apply quality control in all production processes, ensuring a high quality level to all products we manufacture. The use of first quality materials and a rigorous control in the handling processes guarantees the consumer the high quality of the product. Our high quality raw materials are produced in Germany, Holland and Italy. We use only environmental friendly metal leagues: CB7555S (brass brass) and CW614N (brass bar); Our chroming is fruit of several years of experience ensuring a perfect level of thicknesses of the pieces, with a micrage level of 10-12 nickel and 0,25 to 0,30 chromium, guaranteeing a strong resistance to wear with a durable and unalterable brightness. Our parts are tested at 100% visually and at the level of seal.
